

GLOBAL STRATEGY

Own the clean *tequila lane.*

*A five-year plan to build the first verified organic and additive-free
tequila with global distribution — market by market.*

UNITED STATES • EUROPE • ASIA-PACIFIC

THE STRATEGY

Own the Clean Tequila Lane *Globally*.

Fewer than ten brands worldwide are verified both organic *and* additive-free. None owns the position. We will.

\$15B → \$25B

Global tequila market by 2030.

45–54%

Premium share of consumption in every major region.

Open now

First-mover window — closing fast.

THE OPPORTUNITY

Where the *Money* Is.

SINGAPORE · APAC **WE'RE HERE**

\$1.5B → \$3.1B

First container landed July 2026, built on our established mezcal export channel. APAC reaches \$3.1B by 2032 — the fastest-growing region anywhere, with demand up 49% in 2024.

UNITED STATES

\$9B+

62% of the global market. 31.3M cases a year — the volume prize.

EUROPE

\$1.4B → \$3.2B

By 2033. Highest premium share of any region (54%) — and additive disclosure is law.

Most brands plan their Asia entry. Ours has already cleared customs.

THE ROADMAP

How We Get There: *Three Phases.*

PHASE 1 · NOW – YEAR 2

Grow Singapore + Launch US

Singapore: convert landed inventory into 40–50 premium on-trade accounts, cocktail-bar programs and duty-free placement, leveraging existing mezcal relationships. US: California, Texas, Arizona and Nevada, on-premise first.

PHASE 2 · YEARS 2–3

Europe

Enter via Spain — the world's #2 importer — and Germany, then UK premium on-trade. Lead with EU organic certification.

PHASE 3 · YEARS 3–5

Asia Expansion from Singapore

Singapore becomes our APAC base: Japan, Hong Kong and Malaysia, then China Tier-1 on-trade and duty-free.

Singapore isn't a future market — it's our proof of concept and our regional springboard.

EXECUTION

The Playbook *Per Market.*

SINGAPORE

Premium sipping positioning in Asia's cocktail capital — top-50 bar programs, duty-free discovery, trade tastings. Our mezcal track record opens the doors; tequila's familiarity closes them.

UNITED STATES

Third-party verification (Additive Free Alliance) plus USDA Organic as the story bartenders tell. Target the four states that make 40% of national volume.

EUROPE

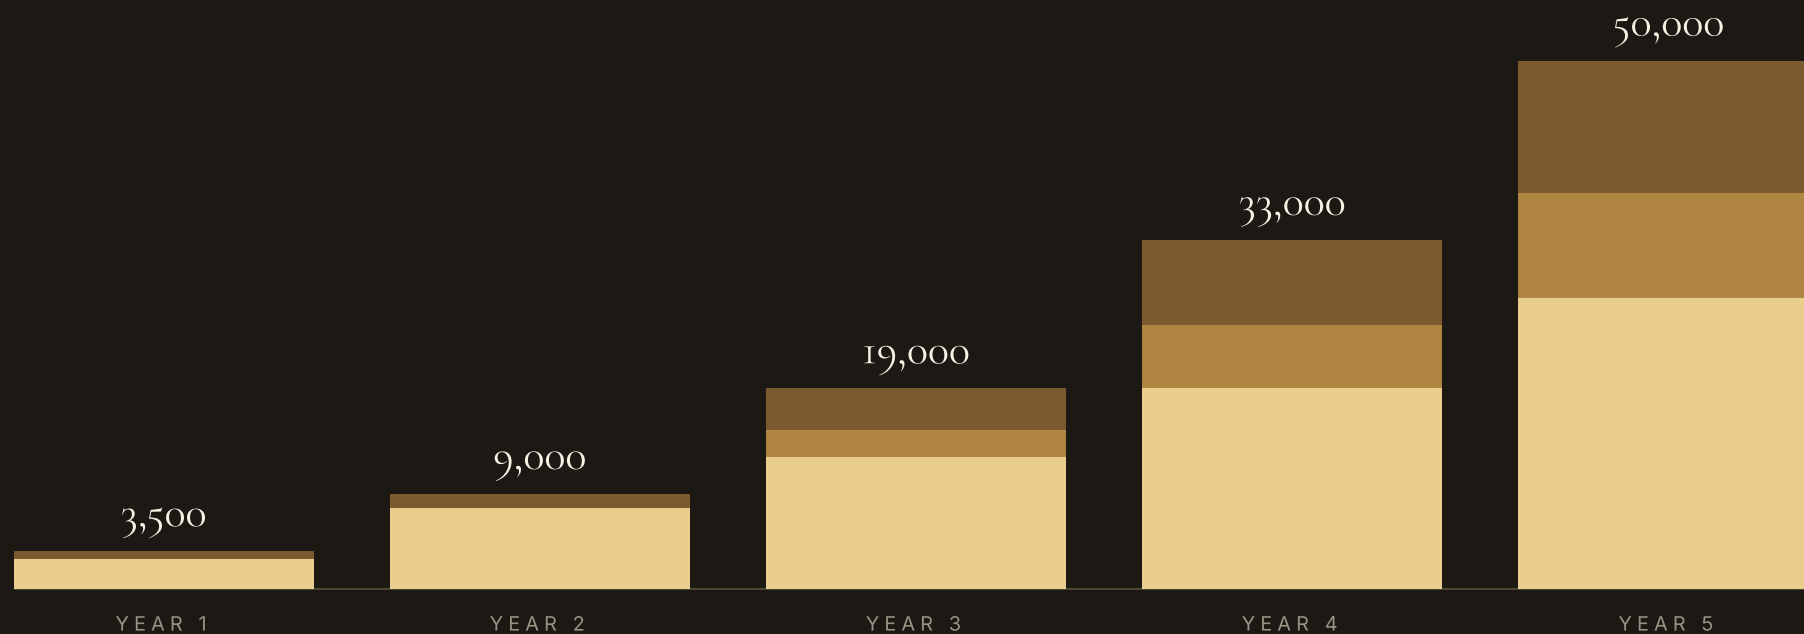

The only region where additive disclosure is legally required — our certifications become provable claims competitors can't fake. Importer partnerships in Spain and Germany.

Same brand, one story — transparency — told in the dialect each market trusts.

THE NUMBERS

How Much We Sell: *Volume.*

■ US ■ EUROPE ■ SINGAPORE / ASIA

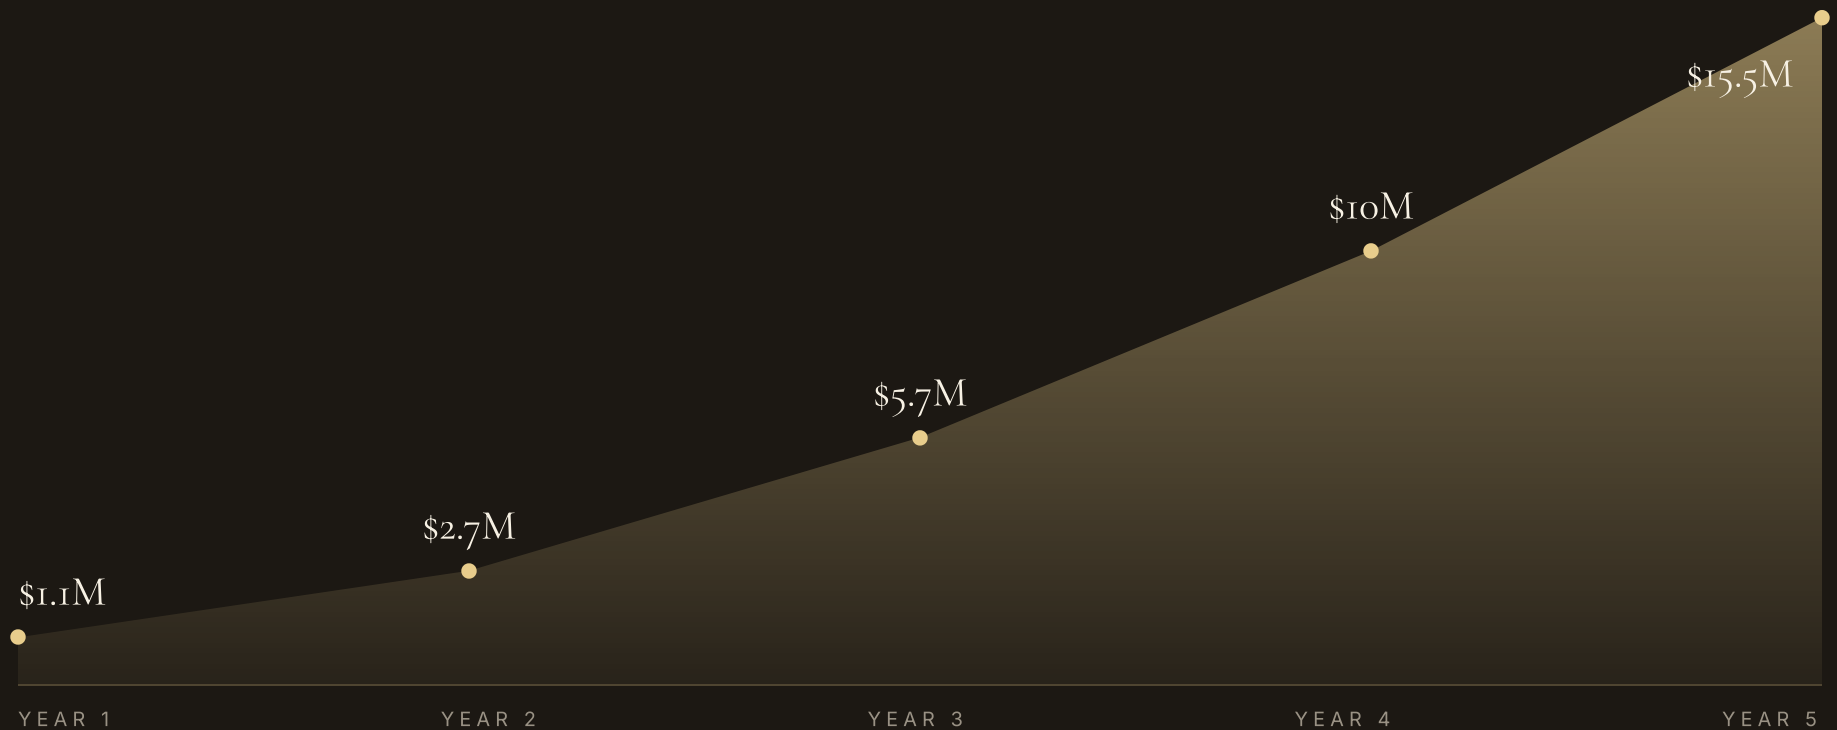

Asia isn't the last 15% of the plan — it's revenue from month one and 25% of the business by Year 5. Nine-litre cases; US 55% / Asia 25% / EU 20% by Year 5.

THE NUMBERS

How Much We Sell: *Revenue.*

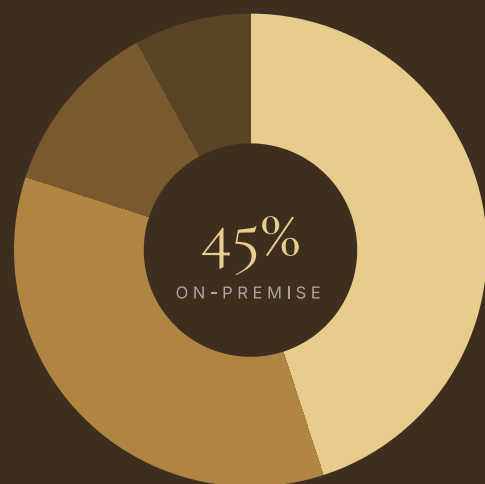

\$15M+
BY YEAR FIVE

Based on ~\$300 per case supplier revenue at \$50–\$55 retail. Singapore's premium pricing runs equal or higher per case than the US — early Asia volume is high-margin volume.

THE NUMBERS

Where It *Sells*.

- 45% On-premise — bars and restaurants, where the category is discovered.
- 35% Off-premise retail.
- 12% E-commerce and direct-to-consumer.
- 8% Duty-free and travel retail.

On-premise leads years one and two — bartenders are the sales force for a verification story — then retail scales what bars validate.

THE ASK

Why We Win — *And What We Need.*

The only organic and additive-free brand already operating in Asia's premium gateway.

A story with legal teeth in the EU and zero competition in Asia.

A category growing 10%+ annually in every target region.

THE ASK

SINGAPORE

On-trade partners to take us from landed inventory to *50 premium doors* in 12 months.

UNITED STATES

Distribution partners for a Year-1 launch in *CA, TX, AZ and NV.*

The clean tequila lane is open. It won't be in three years.

Projections: internal targets based on Beverage Information Group, Mordor Intelligence, Grand View Research market data and craft-brand benchmarks
