

GLOBAL STRATEGY

Own the clean *tequila lane*

A five-year plan to build the first verified organic, hand-crafted and additive-free tequila with global distribution — market by market.

ASIA-PACIFIC · UNITED STATES · EUROPE

28 JULY 2026

THE STRATEGY

Own the Clean Tequila Lane *Globally*

Up to ten brands worldwide are verified organic, hand-crafted *and* additive-free.

Global tequila market by 2030.

USD 15B → 25B

Premium share of consumption in every major region.

45–54%

First-mover window — closing fast.

Open now

THE OPPORTUNITY

Where the *Money* Is

SINGAPORE **WE'RE HERE**

Our APAC hub

USD 1.5B → 3.1B

First container landed July 2026, built on our established mezcal export channel. APCA which includes the giants; China, Japan, India, Australia and Southeast Asia including Singapore our APCA hub — reaches \$3.1B by 2032, the fastest-growing region anywhere, with demand up 49% in 2024.

Most brands plan their Asia entry. Ours has already cleared customs.

UNITED STATES

USD 9B+

62% of the global market. 31.3M cases a year — the volume prize.

EUROPE

USD 1.4B → 3.2B

By 2033. Highest premium share of any region (54%) — and additive disclosure is law.

THE ROADMAP

How We Get There: *Three Phases*

PHASE 1 · NOW – YEAR 2

Grow the Singapore Hub + Launch US

Singapore: convert landed inventory into 40–50 premium on-trade accounts, cocktail-bar programs and duty-free placement, leveraging existing mezcal relationships. US: California, Texas, Florida, North Carolina and Illinois — the top five volume states — on-premise first.

PHASE 2 · YEARS 2–3

Europe

Enter via Spain — the world's #2 importer — and Germany, then UK premium on-trade. Lead with EU organic certification.

PHASE 3 · YEARS 3–5

Asia Expansion from Singapore

Japan, Hong Kong and Indonesia from our Singapore base, then China Tier-1 on-trade and duty-free.

Singapore is live today — our proof of concept and our regional springboard.

Internal rollout plan; market sizing per Statista (CRT export data), Inkwood Research and Mordor Intelligence

EXECUTION

The Playbook *Per Market*

SINGAPORE · OUR APAC HUB

Premium sipping positioning in Asia's cocktail capital — top-50 bar programs, duty-free discovery, trade tastings. Our mezcal track record opens the doors; tequila's familiarity closes them.

JAS Organic

UNITED STATES

Third-party verification (Additive Free Alliance) plus USDA Organic as the story bartenders tell. Target the top five volume states — California, Texas, Florida, North Carolina and Illinois.

USDA Organic

EUROPE

The only region where additive disclosure is legally required — our certifications become provable claims competitors can't fake. Importer partnerships in Spain and Germany.

EU Organic
certified by Bioagricert

Same brand, one story — transparency — told in the dialect each market trusts.

Sources: Additive Free Alliance / Tequila Matchmaker; USDA Organic; EU Regulation 2019/787 (spirit-drink labelling); Beverage Information Group state volume data

THE NUMBERS

How Much We Sell: *Volume*

Cases per year — 6 × 700 ml bottles per case

■ US ■ EUROPE ■ SINGAPORE / ASIA

Singapore carries Year 1, and Asia still holds 35% of the business by Year 5 — a two-engine plan built on Asia and the US alike. Year 5: 100,000 cases, 600,000 bottles of 700 ml, mixed US 45% / Asia 35% / Europe 20%.

Internal projections, benchmarked against craft-brand case volumes (Beverage Information Group; Impact Databank)

THE NUMBERS

How Much We Sell: *Revenue*

FOB revenue per year, in US dollars

All figures in US dollars, based on an average of \$95.00 per case of six 700 ml bottles, FOB San Julián, Jalisco. Singapore's premium pricing runs equal or higher per case than the US — early Asia volume is high-margin volume.

Internal projections in USD at an average \$95.00 per case of six, FOB San Julián, Jalisco; premium price bands per IWSR and Mordor Intelligence

THE NUMBERS

Where It *Sells*

■ 45% On-premise — bars and restaurants, where the category is discovered.

■ 35% Off-premise retail.

■ 12% E-commerce and direct-to-consumer.

■ 8% Duty-free and travel retail.

On-premise leads years one and two — bartenders are the sales force for a verification story — then retail scales what bars validate.

Internal channel plan; on-/off-trade and travel-retail splits per IWSR and Mordor Intelligence

THE ASK

Why We Win — *And What We Need*

The only organic, hand-crafted and additive-free brand already operating in Asia's premium gateway.

A story with legal teeth in the EU and an open field in Asia.

A category growing 10%+ annually in every target region.

A premium and super-premium brand throughout — priced, packaged and poured alongside sipping whisky and cognac.

THE ASK

SINGAPORE

On-trade partners to take us from landed inventory to *50 premium doors* in 12 months.

UNITED STATES

Distribution partners for a Year-1 launch in *CA, TX, FL, NC and IL*.

The clean tequila lane is open today — and the brands that claim it now will hold it.

Projections: internal targets based on Beverage Information Group, Mordor Intelligence, Grand View Research market data and craft-brand benchmarks
